

FORMULA
FLOORS

FIRST IN CONCRETE PAVEMENT SYSTEMS

THE WINNING FORMULA

Formula Floors uses an optimised combination of the right ingredients to provide high quality industrial floors and pavements.

The Formula Floor system incorporates and provides for;

- Design and documentation of the Formula Floors package;
- Overview specification of the concrete and sub-grade;
- Documentation and engineering drawings incorporating standardised joints and details for the Formula Floor system;
- Engineering certification to local building standards;
- On-going project overview;
- Partnership with Accredited Placing Contractors;
- State-of-the-Art Placing Technology;
- Construction of high quality burnished finish super flat industrial pavements;
- Acknowledged, faster construction periods, giving the potential for taking the floors and pavements off the critical path of the building process;
- An economical solution;
- Utilisation of Dramix Steel Fibres - universally acknowledged as the highest performance and best technically supported product in the Steel Fibre Reinforced Concrete marketplace, worldwide.

Proven benefits of Formula Floors include:

FEATURE	BENEFIT
• Dramix steel fibre reinforcement	• Cost savings as there is no time-consuming placing of mesh • Superior overall strength as reinforcement is always in the right place
• Use of the latest equipment for mixing, leveling, curing and finishing	• Fast construction (1000 to 2000m ² per day) with crews half the size of those associated with conventional concrete floors
• Laser screeding	• Very accurate level maintenance for easier construction of racking and other structures
• Increased space between joints	• Lower costs due to less joint maintenance, fewer fork lift repairs and less operator discomfort
• Superior load bearing properties	• Dramix Limit State Design methodology results in thinner concrete thickness for the same load bearing capacity.

Formula Floors win on all counts. They are faster to construct and offer superior all round cost/performance benefits.

Bunnings

Name: Bunnings Distribution Warehouse
Location: Hallam, Victoria
Builder: Pellicano Builders
Contractor: Auspave

Accredited Placing Contractors

BOSFA can arrange competitive quotations of a Formula Floor for your project from our Accredited Placing Contractors, who have the reputation, experience and equipment to build your floors and pavements.

BOSFA Design Management

Uniquely **BOSFA** has encompassed the responsibility for engineering design for its Dramix® Steel Fibre Reinforced Pavement System, "Formula Floors", by providing **BOSFA DESIGN MANAGEMENT** and this service is available and is readily accepted by reputable builders of commercial and industrial projects.

Many multinational companies and local companies have dealt with **BOSFA** to build quality projects and they include some of the following;

- Amcor
- Bunnings
- Exel
- Laminex
- Mitek
- Visy Pak
- Remington
- General Motors Holden Global Engine Plant
- ACI
- Bluescope Lysaght
- FCL Container Park
- Kimberley Clark
- New Wave Logistics
- Yalumba Wineries
- Patricks Corporation
- Carter Holt Harvey
- Capral Aluminium
- Hi Trans
- Metcash
- Scotts Transport
- Nylex
- Chifley Industrial Units

Chifley Estate

Location: Moorabbin, Victoria
Builder: Qanstruct
Projects: Coca Cola, Storpak
Contractors: V & G Concrete Construction P/L
 Anglo Italian Concrete

AND THE WINNER IS ...

Formula Floors outperforms the competition in all facets of construction, offering high impact resistance, greater durability, conformance to floor specifications for operating performance with fewer joints and less maintenance. If you want a faster floor or pavement at an economical advantage providing these features, Formula Floors must be a consideration for your projects.

It's no wonder leading companies have chosen Formula Floors for their latest facilities.
