

QANSTRUCT COMPLETE 39,000M2 FOR LINFOX

Melbourne builder Qanstruct have just completed a large distribution facility at Erskine Park Sydney for transport giant Linfox.

The internal slabs were designed by BOSFA using their Design Management approach and high performance Dramix Steel Fibres.

Design to carry a 6tonne post load for high racking the concrete was placed and finished to a high standard in very quick time. It took just 5 weeks to complete the internal area of 39,000m2.

Placed by Addusso Concrete, with State of the Art Laser Screed technology, the Dramix steel fibre design made the process simple and uncomplicated.

High quality concrete was supplied by Western Suburbs Concrete, Penrith, meeting the strict requirements of the builder in the area of quality control and delivery.

DESIGN SPECIFICATIONS:

BUILDER: QANSTRUCT

DESIGNER: BOSFA Pty Ltd/ FMG KOUKOUROU

CONTRACTOR: ADDUSSO CONCRETE

CONCRETE SUPPLY: WESTERN SUBURBS CONCRETE

SLAB THICKNESS: 160mm

CONCRETE STRENGTH: 40MPa

PROJECT SIZE: 39,000m2

FIBRE TYPE: 20kg/m3 Dramix RC65/60BN Steel Fibre
